## SCHOOL REPORT.

Report of the School Board of the town of Woodstock, for the year ending 1890.

We, the undersigned, respectfully submit the following annual report.

There have been five terms of school the year past. At the Centre of the town two terms have been taught. Average daily attendance 24.

The first or summer term of ten weeks, was under the instruction of Miss Lilla Thurston, of Centre Harbor. Miss Thurston is a Normal school graduate, and the scholars finding her method of instruction different than have been taught here previously, did not advance quite as much as we would have desired, although we consider it a very good school.

The second or fall term of twelve weeks was under the management and instruction of Miss Affie A. Russell of Lincoln. Miss Russell is an experienced teacher and her efforts were rewarded with grand success, both as an instructor and a manager, and we feel justified in saying it is a first-class school.

We find on roll of perfect attendance, first term, Blanche E. Fox, Addie B. Sargent, Vincent Sawyer, Frank Woodbury. Second term, Alice M. Peaslee, Eliza Bagley, John Gray, Isaac Sawyer, Harry Sawyer.

In the north part of the town there have been seventeen weeks of school. Whole number of different pupils registered for the year, 35, average attendance, 26. First term of seven weeks was taught by Miss Nellie B. Russell of North Woodstock. This was Miss Russell's second experience in teaching and her efforts were attended with success. Whole number of pupils 24, average attendance 21. We find the names of Harry C. Clark, Charlie W.

Clark, Hollis Gordon, Scott Howland, Fred Smith, Sadie Burney, Annie Howland, Flossie Howland, Lizzie Sharon and Lillian Sharon on the roll of perfect attendance.

Second term of ten weeks was under the instruction of W. S. C. Russell of North Woodstock. Whole number of pupils : 5, average attendance 26. Mr. Russell is a graduate of the New Hampton Institution where so many good teachers have been instructed. He finished his course there in June and came to this school with the accomplishments of a good and profitable teacher and proved himself to be such, although he had had no previous experience in teaching. Names of those on roll of perfect attendance, Harry C. Clark, Charlie W. Clark, Thomas Sawyer, Ellen Howland and Flossie Howland.

The new school house was used for the second term of school and all found it pleasant and comfortable—a great improvement upon the old. If money could be raised to furnish the school room with maps, a globe and a dictionary, the children could be still much better instructed.

In the south part of the town, or which is known as Tannery district, there have been thirteen weeks of school taught by Alice E. Sawyer of Woodstock. This is Mrs. Sawyer's first school in this district, and we think she put in a hard term's work, which showed that success attended her. Roll of perfect attendance, Leon L. Sawyer, Omar E. Sawyer.

# The 100 Cents in a Dollar.

**The shrewd farmer** everywhere seeks fertilizers that will increase his crops and so enlarge his income. He not only demands one hundred cents' worth of plant-food in every dollar's worth of fertilizer that he purchases, but his investment must also pay a handsome dividend in the increased value of his crops. The state chemists report a high valuation on our goods, but the highest valuations that we receive are from the farmers themselves, who have used our goods and who know, therefore, whereof they speak.

that  
values  
is the  
Notice

**The thoughtful farmer** will notice the state reports do not give the *agricultural* of the fertilizers, whereas the agricultural value only value which benefits the growing plant. these *facts*:—

1. A State  
elements  
not rate  
leather;  
while

valuation does not tell from what source the of plant-food are derived. For example: it does nitrogen in blood any higher than nitrogen in yet nitrogen in blood is a most valuable plant-food, nitro gen in leather is almost worthless.

2. A State valuation does not take into account the proportions of plant-foods in the fertilizer. This, however, is of vital importance to the plant in promoting its growth.

**The progressive farmer** will always purchase the **Bradley Fertilizers** because they are composed of the best materials, combined in those proportions that experience has shown produce the largest crops. *We will send you on application "Bradley's American Farmer," which will tell you all about our fertilizers, and give you the reasons for their great success. Address*

**BRADLEY FERTILIZER CO., 27 Kilby St., Boston.**
